# Olink™ Target 96 bundle promotion

## Connect pathways, biomarkers, and disease biology

Diseases are driven by complex, interconnected biological pathways spanning distinct cellular processes. To support broader pathway exploration, we are offering a limited-time selection of complementary Olink™ Target 96 panel bundles designed around key research areas and disease biology.

**Limited-time bundle promotion: First come first serve basis**

Receive promotional pricing when ordering eligible Olink Target 96 panel combinations. Contact your Olink representative for bundle availability, regional pricing, and ordering information.

Part No.	Bundle	Included panels	Total unique targets
BD0040	<b>Olink Target 96 Immunology / Inflammation Bundle</b> Comprehensive immune profiling spanning innate and adaptive immunity, chronic inflammation, and the tumor immune microenvironment.	Olink Target 96 Inflammation Olink Target 96 Immune Response Olink Target 96 Immuno-Oncology	220
BD0041	<b>Olink Target 96 Neuro-Immune Axis Bundle</b> Captures neurodegeneration plus neuroinflammation that links brain pathology with systemic immune drivers (Alzheimer's, MS, neuroimmune disorders).	Olink Target 96 Neurology Olink Target 96 Neuro Exploratory Olink Target 96 Inflammation	274
BD0042	<b>Olink Target Neuro Discovery-to-Translation Bundle</b> Measure disease, understand mechanisms, and discover drivers. Combines well-established neurodegeneration biomarkers with CNS biology and pathway-level insights.	Olink Target 48 Neurodegeneration Olink Target 96 Neurology Olink Target 96 Neuro Exploratory	219
BD0043	<b>Olink Target 96 Oncology Systems Biology Bundle</b> Tumor + immune system profiling in one workflow to capture tumor signaling, angiogenesis, and immune evasion. Natural extension from a single oncology panel.	Olink Target 96 Oncology II Olink Target 96 Immuno-Oncology	166

Part No.	Bundle	Included panels	Total unique targets
	<b>Olink Target 96 Cardio-Metabolic Risk Bundle</b>		
BD0044	Broad coverage across disease-relevant pathways of lipid metabolism, insulin resistance, vascular inflammation, and cardiac injury / remodeling with low redundancy.	Olink Target 96 Cardiovascular II Olink Target 96 Cardiovascular III Olink Target 96 Cardiometabolic Olink Target 96 Metabolism	<b>367</b>
	<b>Target 96 Discovery Bundle</b>		
BD0045	Expand beyond known pathways into discovery space. Maximizes novel target space with zero overlap and high new biology per panel.	Olink Target 96 Neuro Exploratory Olink Target 96 Metabolism	<b>184</b>

\* Reflects the count of distinct UniProt IDs across the panels in the bundle.

### Promotion period:

1 July 2026 – 31 December 2026.

### Order eligibility window:

Customer purchase order must be received within the promotion period. Kit ship dates may extend beyond the promotion period subject to standard lead times.

### Terms & conditions

- Bundle pricing applies only when all listed panels of a bundle are purchased together on a single purchase order; partial bundles do not qualify for the bundle price.
- Bundle SKUs may be combined with each other on the same order, but bundle pricing cannot be combined with volume discounts, distributor discounts, or any other promotional or contractual discount programs.
- Bundle promotions are not part of, and do not modify, any existing master pricing agreement, framework agreement, or quote already in place.
- Maximum of five (5) bundle purchases per customer over the duration of the promotion period.
- Bundle pricing does not apply to panel accessories (e.g. Integrated Fluidic Circuits / IFCs, Signature Q100 consumables); accessories are billed at standard list price.
- Eligible customer segments: new customers, lapsed customers (no Olink Target 96 panel orders in the past 6 months), and strategic accounts. Sales representatives must confirm eligibility prior to quote issuance.

- Bundle prices are quoted in USD; regional pricing in other currencies follows the standard Olink / Thermo Fisher Scientific FX schedule. Taxes, duties, freight, and installation are not included.
- Thermo Fisher Scientific reserves the right to modify, extend, or terminate this promotion at any time. Any change will not affect purchase orders already accepted by Olink.
- Thermo Fisher Scientific products are For Research Use Only. Not for use in diagnostic procedures.

## ONCOLOGY SYSTEMS BIOLOGY BUNDLE - 2 Panels | 166 Unique targets

### Integrated oncology and immune profiling

By integrating the Olink Target 96 Oncology II and Immuno-Oncology panels, this bundle supports broader systems-level investigation of tumor biology across biomarker discovery and translational oncology research. Gain deeper insights into tumor signaling, immune evasion, angiogenesis, and more.

### Key biology covered

#### Tumor-immune crosstalk

Immuno-oncology: TNF, CXCL9, CCL2, CXCL10  
Oncology II & Immuno-oncology: IL6

Profile cytokine and chemokine signaling involved in immune-cell recruitment, inflammation, and tumor-immune interactions.

#### Tumor signaling and angiogenesis

Oncology II & Immuno-oncology: HGF, VEGFA

Investigate pathways associated with tumor growth, neovascularization, metastasis, and angiogenic signaling.

#### Immune checkpoints and effector cytokines

Immuno-oncology: PD-L1, LAG3, IFNG, IL2, CD40

Expand insight into immune-evasion mechanisms and antitumor immune activity.

#### Natural killer (NK) cell biology

Immuno-oncology: NCR1

Explore NK cell activation and cytotoxic immune responses.

#### Translational tumor biomarker

Oncology II: CEA  
Oncology II & Immuno-oncology: Mucin-16

Identify clinically relevant tumor-associated proteins used in disease monitoring and translational oncology research.
